

**POSITION POSTING** – Full Stack Ruby-on-Rails Developer**Location: London, UK**

This is a unique opportunity for an experienced Full Stack Ruby-on-Rails Developer, to join a high profile and fast-growing Fintech firm. Please submit your cover letter and CV to [piers@neudata.co](mailto:piers@neudata.co)

**COMPANY**

Industry-leading FinTech firm Neudata is the only objective and neutral data scouting service that is dedicated to finding alpha-generating data for investment professionals.

Neudata's Software as a Service (SaaS) catalogue of 5000+ dataset reports provide tools for users to easily search, source, manage, and compare data, while leveraging real-time insights from its team of expert research analysts based in London, New York and Shanghai.

Its core philosophy is simple — Neudata catalogues and assesses datasets based on over 100 unique factors & delivers metadata reports and advice for a fee. It doesn't buy data, sell data, or accept revenue-shares or commissions from the data vendors that it recommends. That means users get unbiased intelligence that's tailored to their specific investment thesis.

**JOB DESCRIPTION**

We are looking for full-stack Ruby-on-Rails developers. But, more than this, we're looking for developers who can help to shape a technical culture that can support our ambitious growth plans. That's a culture which values technical excellence, which doesn't cut corners, which thinks about the long term, but which delivers. A team culture of high expectations and mutual respect.

**ROLE RESPONSIBILITIES**

- Gaining a clear understanding of the needs of our users
- Designing, implementing, testing and delivering features, from front to back
- Thinking up-front about deployment and production support
- Supporting the products in production
- Instrumenting the application and understanding exactly how it is used
- Establishing and extending our development tooling
- Contributing to the strategic tech roadmap and to individual product roadmaps
- Shaping, with the CTO, an agile and effective product development process

**YOU SHOULD HAVE**

- Commercial experience of full-stack Ruby-on-Rails development. Experience of multiple projects is preferred
- Demonstrable UI design skills
- Experience with cloud service providers (AWS, Google Cloud, Azure)
- Ability to work in the UK

We are committed to attracting, developing, and advancing the most talented individuals regardless of their race, sexual orientation, religion, age, gender, disability status or any other dimension of diversity.

[www.neudata.co](http://www.neudata.co)

This is a fabulous opportunity to be part of an innovative start-up which is at the centre of a data driven paradigm shift in the Asset Management and FinTech industries.

#### **COMPENSATION**

- Competitive base salary and bonus.
- Paid volunteering days.
- CFA programme sponsorship and study leave days.
- Applicants must be already eligible to work in the UK
- Please submit your CV with salary expectations to [piers@neudata.co](mailto:piers@neudata.co)
