

POSITION POSTING: **Research Associate**
Location: **London**

COMPANY

Headquartered in London, Neudata helps sophisticated investment managers find new data sources, alternative data, that can provide unique, timely and granular records of often imperceptible economic activity. Neudata's alternative data expertise lies in uncovering unique datasets from non-conventional sources that are not available on established and commonly used data platforms. Neudata partners with investment managers to uncover and select overlooked information and focus on global equity, currency, commodity, fixed income and derivatives market intelligence.

The Neudata team and its global data-scouting network are at the forefront of data innovation for investment management. Our clients include some of the most successful and innovative data and technology driven hedge funds in the US, Europe and Asia.

JOB DESCRIPTION

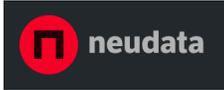

The role primarily involves conveying the research team's findings on alternative data sources to our asset management clients in order to assist them in their investment process. Communicating these findings in an effective, succinct and opinionated manner is a crucial part of this position, as we pride ourselves on being an independent voice on the alternative data market. As such, experience involving regular interaction with investment managers (e.g. sell-side equity sales) is highly preferable. As a secondary role, the associate may also conduct research calls with data providers and produce research reports for our core data product and services. This is an opportunity to become a key team member at our firm and help shape the course of Neudata's future.

ROLE RESPONSIBILITIES

- Meeting with and conducting phone meetings with investment managers to summarise team findings
- Dealing with ad-hoc inbound requests from clients on which alternative data sources Neudata recommends for particular use cases
- Gathering intelligence on client needs and feeding this back to the wider team
- Summarising the research team's findings to clients through other methods (e.g. tearsheets, email campaigns)
- The role is primarily of a qualitative rather than quantitative nature

YOU SHOULD HAVE

- Must have at least 2 years of investment experience (either buy or sell-side), ideally across different sectors or asset classes
- Intellectual curiosity around how alternative data is used by investment managers
- Adept ability to read research reports and easily 'cut to the chase' on explaining why it is or isn't interesting for our clients
- Strong knowledge of asset management and financial markets
- Confident telephone manner
- Excellent spoken and written English (ideally English as first language)
- CFA, CAIA or studying towards charter advantageous
- Experience in conducting meetings with C-level executives
- Rigor and a strong work ethic with attention to detail
- Ability to work in the UK

www.neudata.co

This is a fabulous opportunity to be part of an innovative start-up which is at the centre of a data driven paradigm shift in the Asset Management and FinTech industries.

COMPENSATION

- Base salary and bonus dependent on previous experience
- Please submit your CV with salary expectations to HR@neudata.co
